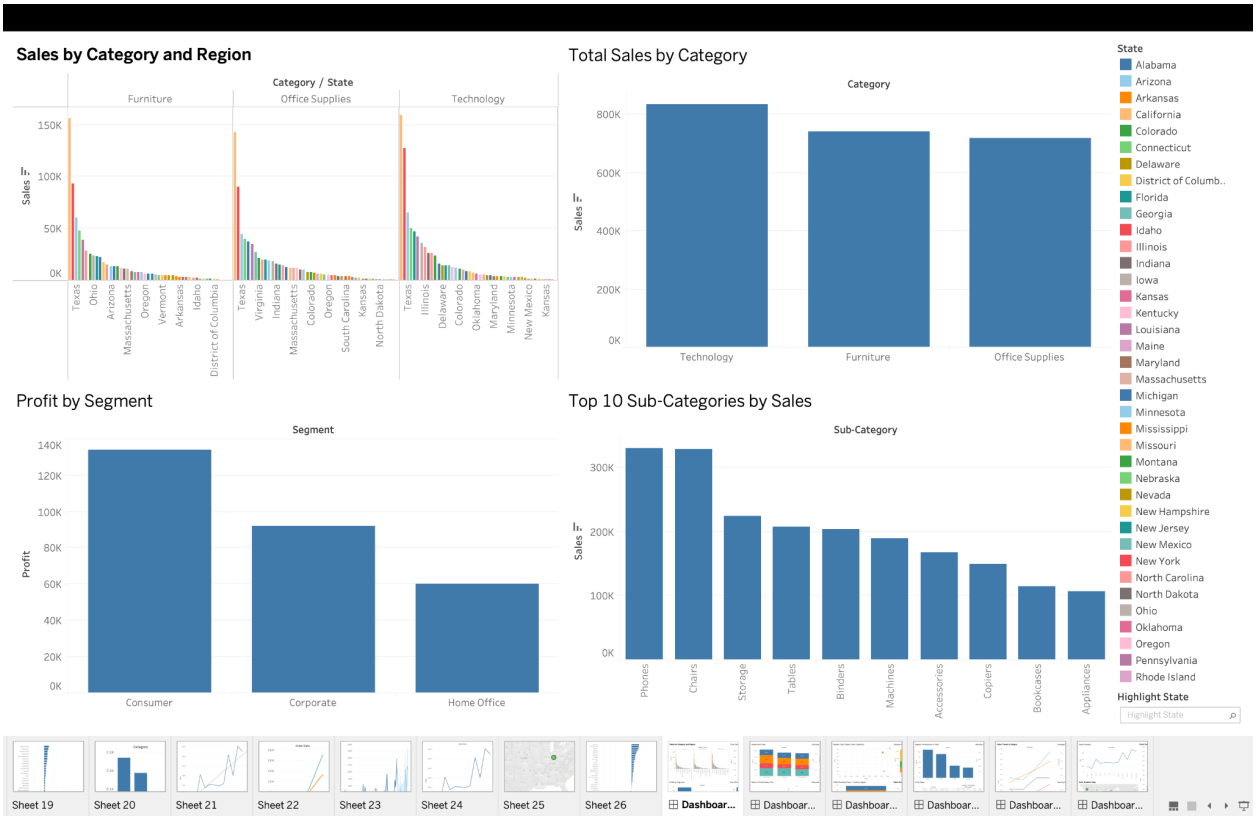
Sample Superstore Data Visualization Report (Tableau)

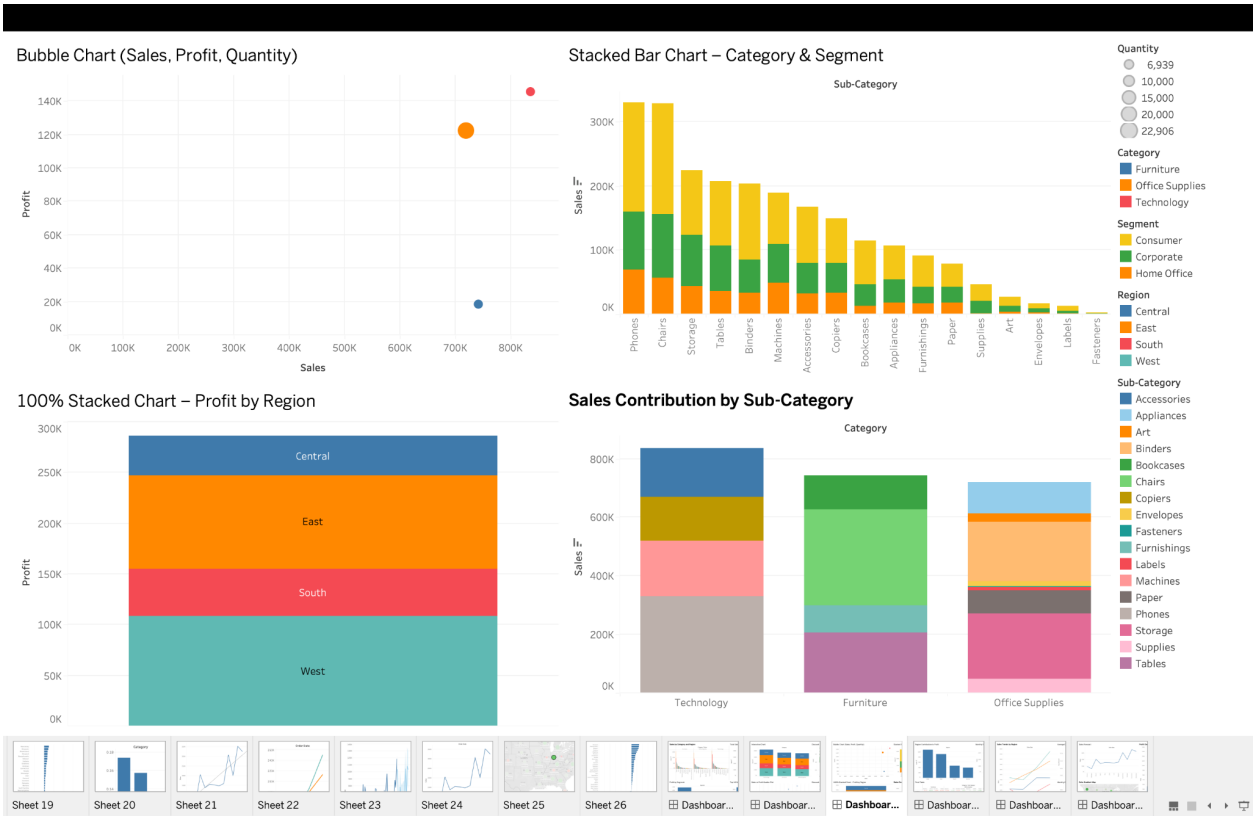
This report presents visual analytics performed on the Sample Superstore dataset using Tableau. The analysis includes bar charts, scatter plots, stacked charts, geospatial maps, and dashboards to analyze sales, profit, discount behavior, and regional performance.

Section A: Category and Sales Analysis



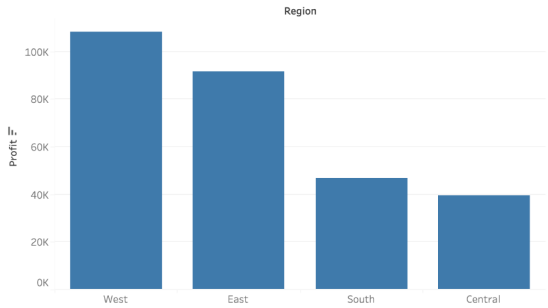
Section B: Scatter Plot Analysis

Section C: Comparative and Stacked Charts

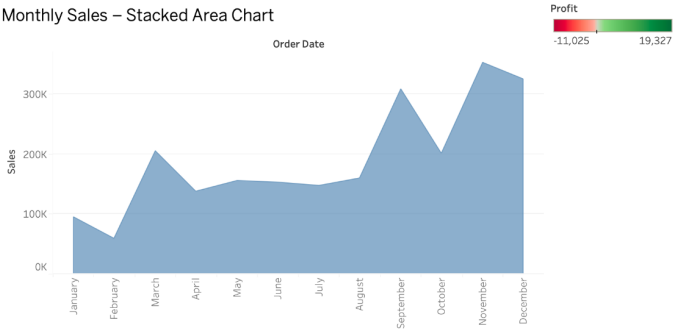


Section D: Regional and Time Series Analysis

Region Contribution to Profit



Monthly Sales – Stacked Area Chart



Pivot Table

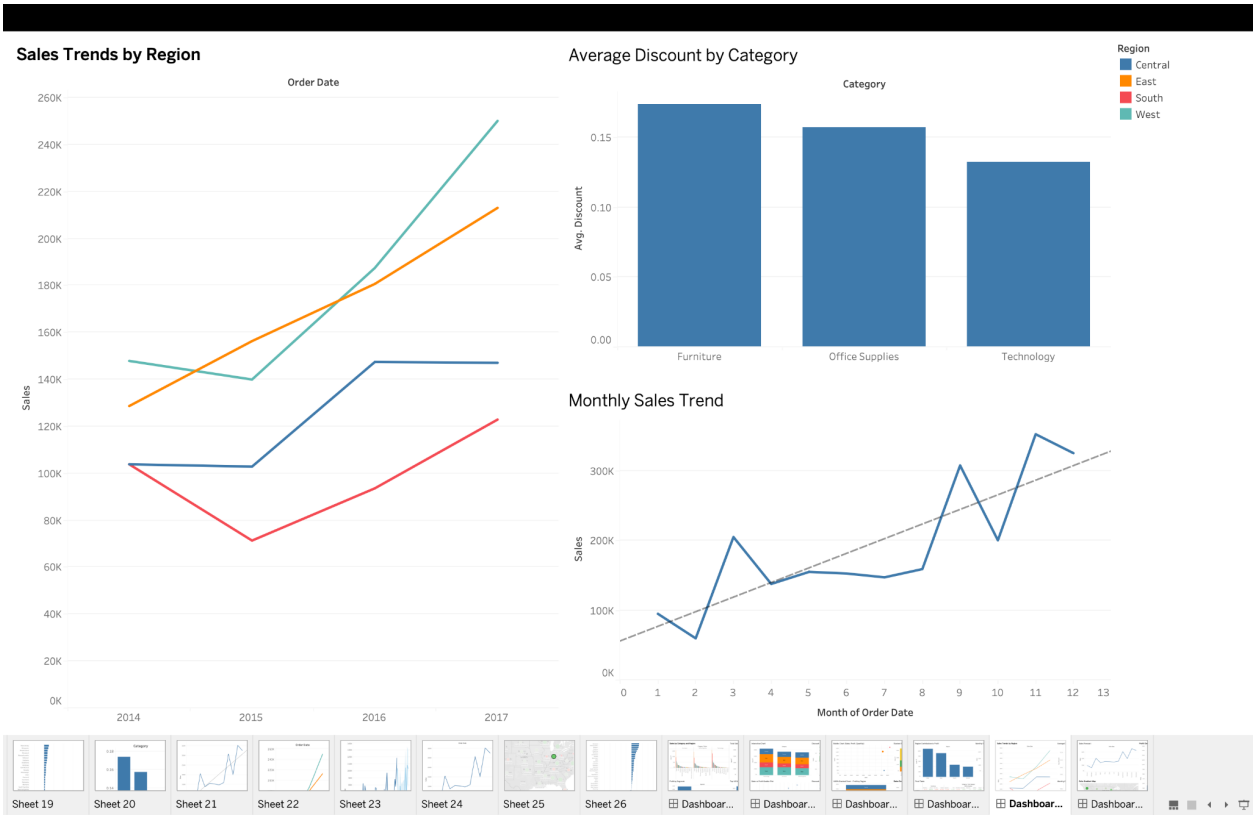
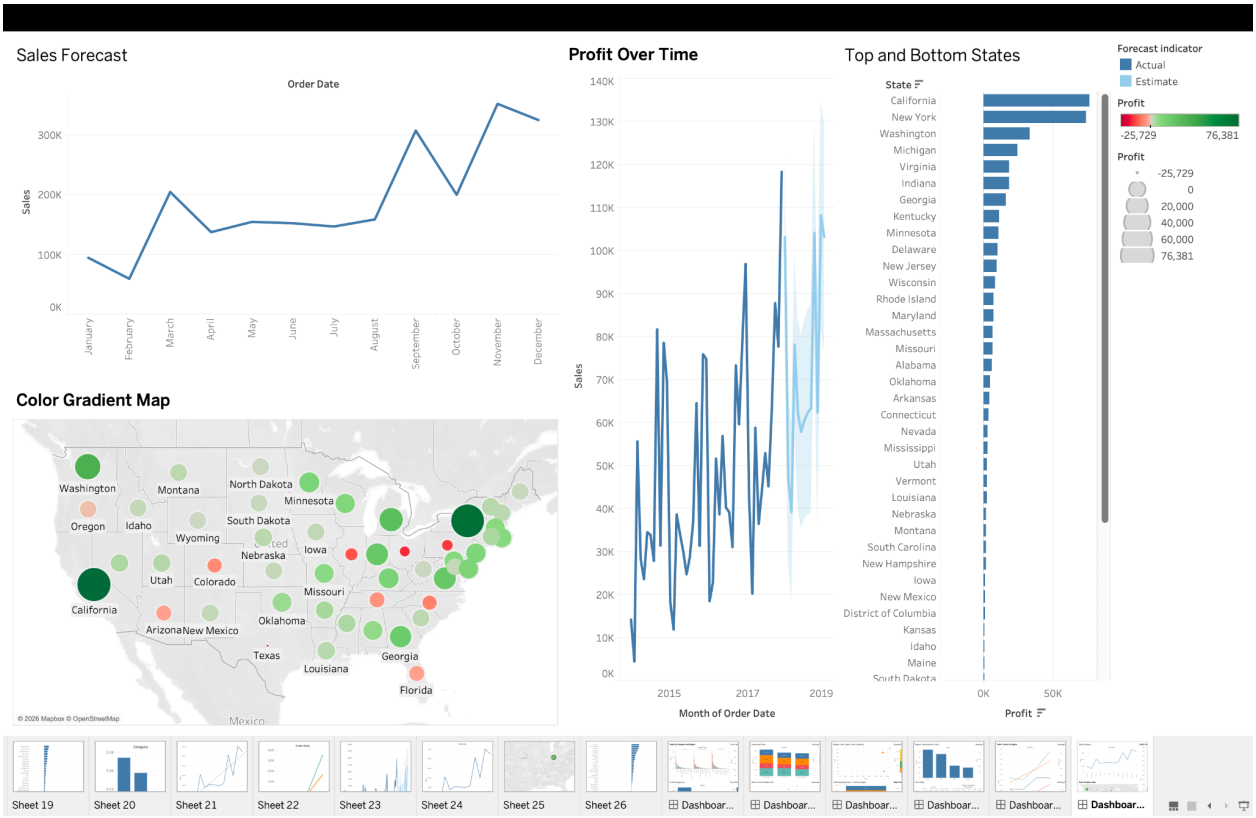
Section E: Forecasting and Profit Trends



Section F: Geospatial Visualization and Dashboard



Conclusion

The Tableau dashboard integrates multiple visualizations to present insights into sales performance, profit distribution, discount impacts, and regional trends. Interactive filters allow users to dynamically explore the dataset and better understand business performance.
